Technical Skills

HTML 5 | CSS 3 | Javascript (ES6) | React JS |

React Native | Redux | RESTful API's | Git |

Bootstrap | Reactstrap | NPM/ YARN | Sass |

Adobe Photoshop | Material UI | Figma/ Wireframing |

Selected Portfolio Projects

"YourShelf" | Book Search Application [DEMO](#) | [REPO](#)

- Conceptualized, wireframed, and coded a React Native application that allows a user to search for any book by title or subject, then save any book they have read in their "digital bookshelf"
- Implemented React Redux for project-wide state management
- Leveraged open-source API's for state management
- Utilized libraries such as React Native Elements and React Navigation

"Q-Weather" | Weather Application [LIVE](#) | [REPO](#)

- Conceptualized and coded a fully responsive React web application in which a user can search by zip code in order to see current or forecasted weather patterns
- Implemented Redux for project-wide state management
- Leveraged open-source application programming interfaces (API's) for weather data
- Utilized libraries such as Material UI and Bootstrap for styling

"Cook It Yourself" | Recipe Website [LIVE](#) | [REPO](#)

- Designed and created a fully responsive web application that allows a user to view different ingredients and recipes for various meals
- Customized login and contact form authentication using Javascript
- Implemented React Router for page navigation
