Andrew **Sutton**

Front End React JS Developer

A hard-working, fast-learning professional who has an eye for both detail and design. Attended a rigorous 5-month-long bootcamp in order to support a need for changing careers. Eager to learn new techniques, tools, and technologies. Capable of conceptualizing and creating responsive, functional web applications. Highly transferable skills such as communication, organization, and problem-solving.

Selected Portfolio Projects

Book Search Application   DEMO | REPO

- Conceptualized, wireframed, and coded a React Native application that allows a user to search for any book by title or subject, then save any book they have read in their "digital bookshelf"
- Implemented React Redux for project-wide state management
- Leveraged open-source application programming interfaces (API's)
- Utilized libraries such as React Native Elements and React Navigation

Recipe Website   LIVE | REPO

- Designed and created a fully responsive S.P.A. that allows a user to view different ingredients and recipes for various meals
- Customized login and contact form authentication using Javascript
- Implemented React Router for page navigation
